

## Environmental and Sustainability Policy

At Boom Construction Limited (BCL), we acknowledge the paramount importance of environmental sustainability in preserving the planet for both present and future generations. We are dedicated to integrating environmental considerations into every facet of our operations and decision making processes.

Through collaboration with stakeholders and continuous improvement initiatives, we strive to set new standards for environmental responsibility in construction. This introduction sets the stage for the comprehensive Environmental and Sustainability Policy that follows, detailing our guiding principles, objectives, and commitments towards achieving our sustainability goals.

BCL's commitment to environmental sustainability is guided by the following principles:

- **BCL's commitment to compliance:** We pledge to adhere to all pertinent environmental laws, regulations, and standards. Through diligent monitoring of our operations, we strive for ongoing compliance and continuous enhancement of our environmental performance.
- **Resource efficiency:** We endeavour to minimise our consumption of natural resources, encompassing energy, water, and raw materials, by deploying efficient technologies and practices across our operations.
- **Pollution prevention:** We are dedicated to preventing pollution by curtailing or eliminating the release of harmful substances into the environment. This entails reducing waste generation, implementing robust recycling programmes, and responsibly managing hazardous materials.
- **Carbon footprint reduction:** We are resolutely committed to diminishing our carbon footprint by establishing targets for reducing greenhouse gas emissions, advocating for energy efficiency, and investing in renewable energy sources.
- **Biodiversity conservation:** BCL recognises the significance of biodiversity conservation, and we will take proactive measures to safeguard and preserve natural habitats and ecosystems impacted by our activities.
- **Stakeholder engagement:** We will actively engage with our stakeholders, including employees, customers, suppliers, and the community to raise awareness of environmental issues and garner feedback on our sustainability endeavour's.
- **Continuous improvement for environmental and sustainable growth:** We will regularly assess and appraise our environmental performance, establish improvement targets, and provide transparent reporting on our progress toward achieving our sustainability objectives.
